Excerpts from ODP Div/Staff Reports for Week Ending 18 March 1983Management Staff

Finance. As of 16 March, there were 66 outstanding advances with a dollar value of \$36,393. No accounts were delinquent.

STAT

IHC Community Information Retrieval System (CIRS)

On 14 March, Alan Winter attended the third CIRS Management Group Meeting at CHB. CIA presented nominations for Agency representatives on the CIRS Security Working Group. Mr. Paul [redacted] Chief, Systems Development Staff, FBIS/DDS&T, briefed on the status of the FBIS modernization program and the possible implications for CIRS. Discussions on a CIRS common language development effort indicated that an estimated 10-15 man-years of effort by each agency would be required to implement the language on each CIRS node. Most members of the group noted that the elimination of the CIRS central funding mechanism would most likely pose problems for them in meeting their CIRS commitments.

Processing

We received the first two shipments of TI 99000-based Delta Data 7260s at the depot. We are in the process of acquiring spare parts and related equipment in order to begin installing them as production terminals. DO locations, needing the 3276 emulator, are the first projected customers.

STAT

VM2 was replaced by an IBM 3081K with 32 megabytes of main storage on 11 March. VM1 and VM2 will now back up each other in off hours and during a prolonged outage. Users can logon to either processor, but are requested to use their assigned processor during prime time for load balancing.

Applications

CAMS Communication. CAMS Division has received a response from the Office of Communications to our request for feasibility and cost data regarding a direct data link between the CAMS2 (P/S) system and [REDACTED]. The purpose of this link will be for use as an alternate path of communications to external interfaces in the event that our primary path, DATEX, is unavailable for an extended period. Commo has agreed to absorb all costs involved, both software and hardware, to effect this alternate path and to make it transparent to current CAMS2 (P/S) design. [REDACTED]

Special Projects Staff

The Office of Communications is estimating that it will complete installation of 2,000 twisted pair of communication lines at the Northside Computer Center (NCC) by 31 March. This will allow connection of 250 terminals to each of the two NCC COMTENS. [REDACTED]

17 March 1983

MEMORANDUM FOR: Deputy Director for Administration

FROM:

Director of Data Processing

SUBJECT: ODP Report for Week Ending 18 March 1983

STAT

1. SAFE Training has Begun

The Office of Training and Education began conducting its first SAFE course for the Office of Central Reference SAFE User Representatives (SURE) on 14 March.

2. External Procurement

ODP concurred in the procurement of two Wang Professional Computers (PCs) by the Information Management Staff, DDO. The Wang PC is being evaluated as part of the CRAFT testbed.

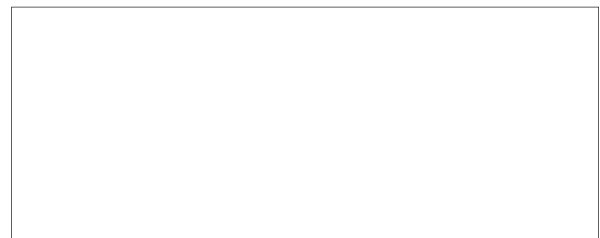

ODP also concurred in the procurement of a Univac 1100/62 mainframe for use by the National Photographic Interpretation Center Development Program Collateral and Information Segment contractor, the Hughes Aircraft Company.

3. Support to the Office of Security

FOURCEE (Community-wide Computer Assisted Compartmentation Control System). The 4C implementation group met on 10 March to discuss the installation status of project 4C. The 4C development team will proceed with the scheduled 31 March IOC date. The time that has been lost because of the delay in installation of terminals at user locations will reduce the time allocated for integrated system test by the development team and 4C users prior to IOC. We plan to perform the system integrated test as users are trained and as terminals are installed/tied down by Office of Communications engineers.

4. Significant Events During Coming Week

None.
